Automated DNA/RNA Extraction
## Upgrade the CyBio FeliX liquid handling platform to a reliable high-throughput extraction robot

Your benefits:
- Magnetic Bead based Extraction and SmartExtraction technology - independent of your starting material
- Save time: Simple procedure, easy to automate
- Get better quality: Optimized pipetting steps for maximum purity of eluted nucleic acids
- Suitable as well for other laboratory routine work

CyBio FeliX platform for liquid handling and automated nucleic acid extraction

Benefit from an automated and ready-to-use extraction solution with high yields, maximum purity and minimum hands on time.

Wide variety of extraction kits with included consumables

Perfectly suited as well for:
- Genetic engineering
- Automated PCR and qPCR
- Serial dilution
- Cellular application
